Readit ZEN MAX
Digital Reading System for Blind

- Paired with Readit software, ZEN MAX delivers near instant, highly accurate OCR with the ability to read text as small as 5pt on up to full A3 page documents
- Text-to-speech and a video magnifier system in one
- Highest resolution 18MP camera for the most accurate recognition results
- 30 fps Full HD magnifier to magnify in real-time, fill in paperwork etc.
- Accurate recognition of complex document layouts and even round objects like food tins
- User-friendly solution for laptop/PC users of all abilities is both compact and lightweight
- Place your document under the camera, press Enter on your keyboard and within seconds, the document is being read aloud, in your desired text size, colour and format
- LED lighting allows capturing in poorly lit areas, even complete darkness
- Instantly save and reformat documents onto your computer
- Designed for the requirements of students, business professionals and home users including anyone on the move with a Windows laptop or PC
- Ideal solution to be moved between locations (e.g. home, work or school)
- Fast multi-page capture: 20 pages per minute capture means you can capture and store entire text books or long documents within minutes
- Compact, lightweight folding stand with tactile positioning guide for left and right sided document capture
- Capture thicker, larger objects more easily and accurately thanks to the higher camera position

Visionaid
INTERNATIONAL

- **Save, load, import, export** (to Word, txt, RTF, MP3), **bookmark** and **annotate** your documents. Carrying books and large documents is no longer required
- When purchased with the **ZEN, ZEN MAX, CoaSt** and **CoaSt Duo** camera systems, users can capture documents at up to **20 pages per minute**, then store them on their PC, laptop and never need the physical book or document again!
- **Automatic document cropping**
- Improves **speed and accuracy** when capturing and importing documents, especially smaller paperwork like receipts, business cards or A5 sized documents by removing anything outside the document area
- **Automatic Filtering of Uncertain Words / Characters**; intelligently removes this additional text so as not to interrupt the flow and reading of the document. If something has been incorrectly filtered out, it can easily be turned back on without having to re-capture the document

- **Ability to print from any application directly to the Readit printer driver for immediate import**. Allows instant reading of any document from within another application e.g. accounts package, website etc.
